Job Description:

The Project Research Scientist I will play a key role in an ICMR-funded project focused on developing advanced sensor strategies for the early detection of cervical cancer biomarkers in serum and blood samples. The role demands strong expertise in surface functionalization techniques (e.g., silanization and alternatives), characterization tools, antibody handling and immobilization strategies, and surface passivation methods. Experience in the preparation and bioconjugation of gold nanoparticles, along with hands-on expertise in biosensor assay development, is essential. The selected candidate will be responsible for the design, planning, and execution of experimental studies, ensuring compliance with Good Laboratory Practices (GLP), maintaining accurate laboratory records, analyzing data, and preparing technical reports. He/she will actively contribute to scientific manuscripts, presentations, and project documentation, while working closely with senior scientists and PhD scholars to integrate molecular assays with sensor platforms towards translation of the biosensor technology.

The role also involves handling large cohorts of clinical samples for pre-clinical validation studies, requiring meticulous attention to detail and adherence to quality standards. Prior industry experience in biosensors, including lateral flow assay (LFA) development is preferred. Prospective candidates are encouraged to provide reference letter directly from the referees via email to yvrsai@smail.iitm.ac.in.

The last date for submission of online application is 18.09.2025.

General Instructions to the candidates
